In this video, harry only explained his experience and his projects that he had built. So no new concept you can find projects inside the projects folder in Harry (Day 02).

For now you don't even have to take a look at those projects a little over view might be beneficial but you don't need to necessarily have to take a look at each line of code of those projects. You will get on to that later on this is for just an overview.

Thank You.
